COMMISSION IMPLEMENTING REGULATION (EU) 2020/602**of 15 April 2020****amending Implementing Regulation (EU) 2017/717 as regards the model forms of zootechnical certificates for breeding animals and their germinal products****(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/1012 of the European Parliament and of the Council of 8 June 2016 on zootechnical and genealogical conditions for the breeding, trade in and entry into the Union of purebred breeding animals, hybrid breeding pigs and the germinal products thereof and amending Regulation (EU) No 652/2014, Council Directives 89/608/EEC and 90/425/EEC and repealing certain acts in the area of animal breeding ('Animal Breeding Regulation') ⁽¹⁾, and in particular Article 30(10) thereof,

Whereas:

- (1) Commission Implementing Regulation (EU) 2017/717 ⁽²⁾ lays down the model forms of zootechnical certificates for breeding animals and their germinal products and it is applicable as of 1 November 2018. Those model forms of zootechnical certificates were developed in consultation with Member State experts and relevant stakeholders in accordance with Annex V to Regulation (EU) 2016/1012 for the issuing of zootechnical certificates by breed societies or breeding operations in accordance with the requirement of Article 30(1) of that Regulation.
- (2) During the period of application of the new model forms of zootechnical certificates Member States and stakeholders notified the Commission of certain practical problems with the use of those model forms, as regards the printing of the zootechnical certificates and the verification of the identity of breeding animals. Also, the issuing of zootechnical certificates for germinal products by a single issuing body appeared to create problems due to the separation between breed societies and breeding operations on the one side and, where authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012, semen collection or storage centres, or embryo collection or production teams on the other side.
- (3) In order to allow breed societies and breeding operations to issue zootechnical certificates on a single sheet of paper, it is necessary to allow both portrait and landscape orientation of the printing. In addition, it should be allowed to replace the printing of the footnotes and notes provided for in the model forms of zootechnical certificates, by printing of a reference to a directly accessible multilingual source of information, such as a valid and verified internet link to the relevant publication in the Official Journal, at a prominent place of the zootechnical certificate.

⁽¹⁾ OJ L 171, 29.6.2016, p. 66.

⁽²⁾ Commission Implementing Regulation (EU) 2017/717 of 10 April 2017 laying down rules for the application of Regulation (EU) 2016/1012 of the European Parliament and of the Council with regard to the model forms of zootechnical certificates for breeding animals and their germinal products (OJ L 109, 26.4.2017, p. 9).

- (4) The format of the pedigree included in the model forms of the zootechnical certificates laid down in Implementing Regulation (EU) 2017/717 provides for an entry of a breeding book number of parents and grandparents of the breeding animal for which a zootechnical certificate is issued. The entry of an individual identification number of parents and grandparents in the pedigree is necessary where it is different from a breeding book number. Moreover, for extensive farming a period of mating rather than a date of mating should be provided in the model form of the zootechnical certificate.
- (5) Zootechnical certificates for germinal products provide information on the germinal products and on the donor animals. There are arrangements in place in some Member States, which require validation of information on a donor animal by a breed society or a breeding operation and on germinal products by a semen collection or storage centre or an embryo collection or production team. Therefore, there is a need to establish, in the model forms of zootechnical certificates for germinal products, a place for the signature of more than one issuing body. It should be also allowed to split the part of zootechnical certificate concerning germinal products from the part related to the donor animal under condition that a copy of the zootechnical certificate issued for the donor animal is attached to the zootechnical certificate issued for germinal products.
- (6) Taking into account the experience gained since Implementing Regulation (EU) 2017/717 became applicable, it is necessary to update the model forms of the zootechnical certificates to facilitate the issuing and printing of those zootechnical certificates and to enable a better verification of the identity of breeding animals. Therefore, it is necessary to amend Implementing Regulation (EU) 2017/717.
- (7) Regulation (EU) 2016/1012 and the delegated and implementing acts adopted under that Regulation provide rules replacing those laid down in Commission Decisions 84/247/EEC ⁽³⁾, 84/419/EEC ⁽⁴⁾, 89/501/EEC ⁽⁵⁾, 89/502/EEC ⁽⁶⁾, 89/503/EEC ⁽⁷⁾, 89/504/EEC ⁽⁸⁾, 89/505/EEC ⁽⁹⁾, 89/506/EEC ⁽¹⁰⁾, 89/507/EEC ⁽¹¹⁾, 90/254/EEC ⁽¹²⁾, 90/255/EEC ⁽¹³⁾, 90/256/EEC ⁽¹⁴⁾, 90/257/EEC ⁽¹⁵⁾, 90/258/EEC ⁽¹⁶⁾, 92/353/EEC ⁽¹⁷⁾, 92/354/EEC ⁽¹⁸⁾, 96/78/EC ⁽¹⁹⁾,

- (9) In order to allow a smooth transition to the new measures, it is necessary to defer the date of application of this Regulation and to provide for a transitional measure as regards the issuing of zootechnical certificates for consignments of purebred breeding animals and hybrid breeding pigs, or their germinal products, in accordance with the models set out in the respective Annexes to Implementing Regulation (EU) 2017/717 prior to the date of application of this Regulation.
- (10) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Zootechnics,

HAS ADOPTED THIS REGULATION:

Article 1

Implementing Regulation (EU) 2017/717 is amended as follows:

- (1) Annex I is replaced by Annex I to this Regulation;
- (2) Annex II is replaced by Annex II to this Regulation;
- (3) Annex III is replaced by Annex III to this Regulation;
- (4) Annex IV is replaced by Annex IV to this Regulation.

Article 2

1. For a transitional period until 4 August 2020, zootechnical certificates for trade in purebred breeding animals and germinal products thereof, and for trade in hybrid breeding pigs and germinal products thereof may be issued in accordance with the relevant models set out respectively in Annexes I and II to Implementing Regulation (EU) 2017/717 prior to this amendment.

**MODEL FORMS FOR ZOOTECHNICAL CERTIFICATES FOR TRADE IN PUREBRED BREEDING ANIMALS
AND THEIR GERMINAL PRODUCTS**

SECTION A

Zootechnical certificate for trade in purebred breeding animals of the bovine, porcine, ovine and caprine species

Zootechnical certificate, in accordance with Regulation (EU) 2016/1012, for trade in purebred breeding animals of the following species: (a) bovine species (<i>Bos taurus</i>, <i>Bos indicus</i>, <i>Bubalus bubalis</i>) ⁽¹⁾ (b) porcine species (<i>Sus scrofa</i>) ⁽¹⁾ ⁽²⁾ (c) ovine species (<i>Ovis aries</i>) ⁽¹⁾ (d) caprine species (<i>Capra hircus</i>) ⁽¹⁾ <i>All EU official languages of the zootechnical certificates, including footnotes and notes, are available in EUR-Lex</i>		<i>(a logo of the issuing breed society or competent authority may be included)</i>
		Certificate number ⁽³⁾
1. Name of issuing breed society/competent authority (provide contact details and, where available, a reference to the website)		
2. Name of breeding book	3. Name of breed of purebred breeding animal	
4. Class within the main section of the breeding book where animal is entered ⁽³⁾		
5. Sex of animal	6. Breeding book number of animal	
7. Identification of purebred breeding animal ⁽⁴⁾ 7.1. System 7.2. Individual identification number 7.3. Animal health identification number ⁽⁵⁾ 7.4. Name ⁽³⁾	8. Identity verification ⁽³⁾ ⁽⁶⁾ ⁽⁷⁾ 8.1. Method 8.2. Result	
9. Date (use format dd.mm.yyyy or ISO 8601) ⁽⁸⁾ and country of birth of animal		
10. Name, address and email address ⁽³⁾ of breeder		
11. Name, address and email address ⁽³⁾ of owner		
12. The pedigree of the purebred breeding animal ⁽⁷⁾ ⁽⁹⁾		
12.1. Sire Breeding book number and section Individual identification number ⁽⁴⁾ ⁽¹⁰⁾ Animal health identification number ⁽⁵⁾ Name ⁽³⁾	12.1.1. Paternal Grandsire Breeding book number and section Individual identification number ⁽⁴⁾ ⁽¹⁰⁾ Animal health identification number ⁽⁵⁾ Name ⁽³⁾

15.3. Name and capacity of the signatory: (insert in capital letters name and capacity of the individual ⁽¹³⁾ signing the certificate)	
15.4. Signature:	

Footnotes:

- (¹) Delete where not applicable.
- (²) A single zootechnical certificate may be issued for a group of purebred breeding animals of the porcine species provided that those purebred breeding animals have the same age and the same genetic dam and sire and that individual information is provided in points 5, 6, 7.2, 13 and, as appropriate, 14 of this zootechnical certificate.
- (³) Keep empty if not applicable.
- (⁴) For animals of the bovine, ovine and caprine species, individual identification in accordance with Union animal health legislation on the identification and registration of animals. For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with Union animal health legislation on the identification and registration of animals.
- (⁵) Only required for animals of the porcine species: Identification number in accordance with Union animal health legislation on the identification and registration of animals of the porcine species.
- (⁶) Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine and caprine species used for the collection of semen for artificial insemination. This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination or for purebred breeding animals of the bovine, ovine, caprine and porcine species used for the collection of oocytes and embryos.
- (⁷) If necessary attach additional sheets of paper.
- (⁸) For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- (⁹) Insert "main section" or "supplementary section" as appropriate. Information on additional generations may be provided.
- (¹⁰) Add individual identification number if different from breeding book number.
- (¹¹) If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- (¹²) Required in the case of pregnant females. Information may be indicated in a separate document.
- (¹³) That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the Member State of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

SECTION B

Zootechnical certificate for trade in semen of purebred breeding animals

Zootechnical certificate, in accordance with Regulation (EU) 2016/1012, for trade in semen of purebred breeding animals of the following species: (a) bovine species (<i>Bos taurus</i> , <i>Bos indicus</i> , <i>Bubalus bubalis</i>) ⁽¹⁾ (b) porcine species (<i>Sus scrofa</i>) ⁽¹⁾ (c) ovine species (<i>Ovis aries</i>) ⁽¹⁾ (d) caprine species (<i>Capra hircus</i>) ⁽¹⁾ (e) equine species (<i>Equus caballus</i> and <i>Equus asinus</i>) ⁽¹⁾ All EU official languages of the zootechnical certificates, including footnotes and notes, are available in EUR-Lex		(a logo of the issuing breed society, competent authority or semen collection or storage centre may be included)

⁽²⁾ Keep empty if not applicable.

⁽³⁾ In case Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor male purebred breeding animal(s) is attached, a reference (certificate number) to that zootechnical certificate of the donor male purebred breeding animal(s) must be provided.

⁽⁴⁾ Part A of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the instructions in footnote 16.

⁽⁵⁾ In the case of purebred breeding animals of the equine species, leave blank if breeding book number is equal to individual identification number.

⁽⁶⁾ Add individual identification number if different from breeding book number. In the case of purebred breeding animals of the equine species, indicate the individual identification number in accordance with point 3 of Chapter I of Part 1 of Annex II to Regulation (EU) 2016/1012, referred to as "unique code" in Article 114(1)(a) of Regulation (EU) 2016/429. If individual identification number is either not available or different from the number under which the animal is entered in the breeding book, enter breeding book number.

⁽⁷⁾ For animals of the bovine, ovine, caprine and equine species, individual identification in accordance with Union animal health legislation on the identification and registration of animals. For animals of the porcine species, individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with Union animal health legislation on the identification and registration of animals.

⁽⁸⁾ Only required for animals of the porcine species: Identification number in accordance with Union animal health legislation on the identification and registration of animals of the porcine species.

- (⁹) Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required by breed societies in accordance with Article 22(2) of Regulation (EU) 2016/1012 for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination.
- (¹⁰) If necessary attach additional sheets of paper.
- (¹¹) For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- (¹²) Insert "main section" or "supplementary section" as appropriate. Information on additional generations may be provided.
- (¹³) If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- (¹⁴) Only required if Part A of the zootechnical certificate is issued by the breed society, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, and Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation.
- (¹⁵) That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- (¹⁶) In case only Part B of the zootechnical certificate is issued by a semen collection or storage centre authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012 and Part A of the zootechnical certificate is kept empty or removed from the zootechnical certificate, point 1 of Part B must be completed and a copy of the zootechnical certificate for donor males must be attached as follows:
- (i) in case of purebred breeding animals of the bovine, ovine, caprine or porcine species, in accordance with the model laid down in Section A of Annex I to Regulation (EU) 2017/717;
 - (ii) in case of purebred breeding animals of the equine species, in accordance with the model laid down in the Annex to Delegated Regulation (EU) 2017/1940, of which at least Part I is incorporated in the single lifetime identification document issued in accordance with Article 118(2)(b) of Regulation (EU) 2016/429.
- (¹⁷) Optional.
- (¹⁸) A straw or another package may contain semen collected from more than one purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 1.4. of Part B.
- (¹⁹) Where applicable, information on sexed semen may be provided.
- (²⁰) For semen intended for the testing of purebred breeding animals of the bovine, porcine, ovine or caprine species which have not undergone performance testing or genetic evaluation, in accordance with the quantity limits referred to in Article 21(1)(g) of Regulation (EU) 2016/1012.
- (²¹) That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of a semen collection or storage centre authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the Member State of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

SECTION C

Zootechnical certificate for trade in oocytes of purebred breeding animals

Zootechnical certificate, in accordance with Regulation (EU) 2016/1012, for trade in oocytes of purebred breeding animals of the following species: (a) bovine species (<i>Bos taurus</i>, <i>Bos indicus</i>, <i>Bubalus bubalis</i>) ⁽¹⁾ (b) porcine species (<i>Sus scrofa</i>) ⁽¹⁾ (c) ovine species (<i>Ovis aries</i>) ⁽¹⁾ (d) caprine species (<i>Capra hircus</i>) ⁽¹⁾ (e) equine species (<i>Equus caballus</i> and <i>Equus asinus</i>) ⁽¹⁾ <i>All EU official languages of the zootechnical certificates, including footnotes and notes, are available in EUR-Lex</i>		(a logo of the issuing breed society, competent authority or embryo production team may be included)

- (a) for donor females:
 - (i) in case of purebred breeding animals of the bovine, ovine, caprine or porcine species, in accordance with the model laid down in Section A of Annex I to Regulation (EU) 2017/717;
 - (ii) in case of purebred breeding animals of the equine species, in accordance with the model laid down in the Annex to Delegated Regulation (EU) 2017/1940, of which at least Part I is a dedicated Section of the single lifetime identification document issued in accordance with Article 118(2)(b) of Regulation (EU) 2016/429;
 - (b) for the fertilising semen:
 - (i) as described in point (a), with the necessary adaptations for donor males, or
 - (ii) in accordance with the model laid down in Section B of Annex I to Regulation (EU) 2017/717.
- ⁽¹⁷⁾ Optional.
- ⁽¹⁸⁾ Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.
- ⁽¹⁹⁾ A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female purebred breeding animal fertilised with semen collected from more than one donor male purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 2.4. of Part C.
- ⁽²⁰⁾ Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- ⁽²¹⁾ That individual shall be a representative of the breed society, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

Footnotes:

- ⁽¹⁾ A single zootechnical certificate may be issued for a group of hybrid breeding pigs provided that those hybrid breeding pigs have the same age and the same genetic dam and sire and that individual information is provided in points 4, 5, 6.2, 12 and, as appropriate, 13 of this zootechnical certificate.
- ⁽²⁾ Keep empty if not applicable.
- ⁽³⁾ Delete where not applicable.
- ⁽⁴⁾ Individual identification in accordance with the rules of the breeding programme approved in accordance with Article 8(3), and, where applicable, Article 12 of Regulation (EU) 2016/1012, and identification number in accordance with Union animal health legislation on the identification and registration of animals.
- ⁽⁵⁾ This may be required by breeding operations in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of semen for artificial insemination or used for the collection of oocytes and embryos.
- ⁽⁶⁾ If necessary attach additional sheets of paper.
- ⁽⁷⁾ Add individual identification number if different from breeding book number.
- ⁽⁸⁾ If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- ⁽⁹⁾ Required in the case of pregnant females. Information may be indicated in a separate document.
- ⁽¹⁰⁾ That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the Member State of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

⁽⁸⁾ Add individual identification number if different from breeding book number.

⁽⁹⁾ If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.

⁽¹⁰⁾ Only required if Part A or B of the zootechnical certificate is issued by the breeding operation, or by a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012 and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation.

⁽¹¹⁾ That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

⁽¹²⁾ In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team authorised in accordance with Article 31(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificates attached as follows:

(a) for donor females, in accordance with the model laid down in Section A of Annex II to Regulation (EU) 2017/717;

(b) for the fertilising semen:

(i) as described in point (a), with the necessary adaptations for donor males, or

(ii) in accordance with the model laid down in Section B of Annex II to Regulation (EU) 2017/717.

⁽¹³⁾ Optional.

⁽¹⁴⁾ Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.

⁽¹⁵⁾ A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female hybrid breeding pig fertilised with semen collected from more than one donor male hybrid breeding pig, provided information on all contributing donor male hybrid breeding pigs is provided in point 2.3. of Part C.

⁽¹⁶⁾ Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.

⁽¹⁷⁾ That individual shall be a representative of the breeding operation, or of a competent authority referred to in Article 30(2)(b) of Regulation (EU) 2016/1012, or of an embryo collection or production team authorised in accordance with Article 31(1) of that Regulation, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the Member State of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

ANNEX III

Annex III to Implementing Regulation (EU) 2017/717 is replaced by the following:

‘ANNEX III

MODEL FORMS FOR ZOOTECHNICAL CERTIFICATES FOR ENTRY INTO THE UNION OF PUREBRED BREEDING ANIMALS AND THEIR GERMINAL PRODUCTS

SECTION A

Zootechnical certificate for entry into the Union of purebred breeding animals of the bovine, porcine, ovine, caprine and equine species

Zootechnical certificate, in accordance with Regulation (EU) 2016/1012, for entry into the Union of purebred breeding animals of the following species: (a) bovine species (<i>Bos taurus</i> , <i>Bos indicus</i> , <i>Bubalus bubalis</i>) ⁽¹⁾ (b) porcine species (<i>Sus scrofa</i>) ⁽¹⁾ ⁽²⁾ (c) ovine species (<i>Ovis aries</i>) ⁽¹⁾ (d) caprine species (<i>Capra hircus</i>) ⁽¹⁾ (e) equine species (<i>Equus caballus</i> and <i>Equus asinus</i>) ⁽¹⁾ All EU official languages of the zootechnical certificates, including footnotes and notes, are available in EUR-Lex		(a logo of the issuing breeding body may be included)

Footnotes:

- (¹) Delete where not applicable.
- (²) A single zootechnical certificate may be issued for a group of purebred breeding animals of the porcine species provided that those purebred breeding animals have the same age and the same genetic dam and sire and that individual information is provided in points 5, 6, 7.2, 13 and, as appropriate, 14 of this zootechnical certificate.
- (³) Keep empty if not applicable.
- (⁴) In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- (⁵) Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required for purebred breeding animals of the porcine species used for the collection of semen for artificial insemination or for purebred breeding animals of the bovine, ovine, caprine, porcine and equine species used for the collection of oocytes and embryos in accordance with Article 22(2) of Regulation (EU) 2016/1012 by breed societies maintaining the breeding book where the animal is to be entered.
- (⁶) If necessary attach additional sheets of paper.
- (⁷) For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- (⁸) As regards section of the breeding book, insert "main section" or "supplementary section". Information on additional generations may be provided.
- (⁹) Add individual identification number if different from breeding book number.
- (¹⁰) If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- (¹¹) Required in the case of pregnant females. Information may be indicated in a separate document.
- (¹²) That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

- (³) In case Part A or B of the zootechnical certificate is kept empty or removed from the zootechnical certificate and a copy of the zootechnical certificate issued for the donor female or male purebred breeding animal(s), or for the semen of those male purebred breeding animal(s), is attached, a reference (certificate number) to that zootechnical certificate of the donor female or male purebred breeding animal(s), or of the semen of those male purebred breeding animal(s), must be provided.
- (⁴) Part A or B of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the instructions in footnote 14.
- (⁵) In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- (⁶) Required in accordance with Article 22(1) of Regulation (EU) 2016/1012 for purebred breeding animals of the bovine, ovine, caprine and equine species used for the collection of semen for artificial insemination. This may be required for purebred breeding animals of the bovine, porcine, ovine, caprine and equine species used for the collection of oocytes and embryos in accordance with Article 22(2) of Regulation (EU) 2016/1012 by breed societies maintaining the breeding book where the offspring obtained from those embryos is to be entered.
- (⁷) If necessary attach additional sheets of paper.
- (⁸) For animals of the ovine and caprine species kept in extensive farming conditions, instead of the date of birth, the year of birth (yyyy) and date of identification (dd.mm.yyyy or ISO 8601) may be provided.
- (⁹) Insert "main section" or "supplementary section" as appropriate. Information on additional generations may be provided.
- (¹⁰) Add individual identification number if different from breeding book number.
- (¹¹) If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- (¹²) Only required if Part A or B of the zootechnical certificate is issued by the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012 and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation.
- (¹³) That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- (¹⁴) In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificates attached as follows:
- (a) for donor females, in accordance with the model laid down in Section A of Annex III to Regulation (EU) 2017/717;
 - (b) for the fertilising semen:
 - (i) as described in point (a), with the necessary adaptations for donor males, or
 - (ii) in accordance with the model laid down in Section B of Annex III to Regulation (EU) 2017/717.
- (¹⁵) Optional.
- (¹⁶) Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.
- (¹⁷) A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female purebred breeding animal fertilised with semen collected from more than one donor male purebred breeding animal, provided information on all contributing donor male purebred breeding animals is provided in point 2.2. of Part C.
- (¹⁸) Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- (¹⁹) That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, or of an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.

- (³) Part A or B of the zootechnical certificate may be kept empty or removed from the zootechnical certificate following the instructions in footnote 12.
- (⁴) Delete where not applicable.
- (⁵) In accordance with the legislation on the identification and registration of animals of the country of dispatch.
- (⁶) This may be required in accordance with Article 22(2) of Regulation (EU) 2016/1012 for hybrid breeding pigs used for the collection of embryos by breeding operations maintaining the breeding register where the offspring obtained from those embryos is to be registered.
- (⁷) If necessary attach additional sheets of paper.
- (⁸) Add individual identification number if different from breeding book number.
- (⁹) If the results of performance testing or genetic evaluation can be accessed on a website, a direct reference to that website may be provided instead.
- (¹⁰) Only required if Part A or B of the zootechnical certificate is issued by the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012 and Parts C and D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation.
- (¹¹) That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, who is authorised to sign the zootechnical certificate.
- (¹²) In case only Part C and, where applicable, Part D of the zootechnical certificate are issued by an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of Regulation (EU) 2016/1012, and Part(s) A and/or B of the zootechnical certificate is/are kept empty or removed from the zootechnical certificate, points 1 and 2 of Part C must be completed and copies of zootechnical certificates attached as follows:
- (a) for donor females, in accordance with the model laid down in Section A of Annex IV to Regulation (EU) 2017/717;
- (b) for the fertilising semen:
- (i) as described in point (a), with the necessary adaptations for donor males, or
- (ii) in accordance with the model laid down in Section B of Annex IV to Regulation (EU) 2017/717.
- (¹³) Optional.
- (¹⁴) Where there is more than one embryo in a straw or another package, a clear indication of the number of embryos is required.
- (¹⁵) A straw or another package may contain embryos collected, or produced from oocytes collected, from a single female hybrid breeding pig fertilised with semen collected from more than one donor male hybrid breeding pig, provided information on all contributing donor male hybrid breeding pigs is provided in point 2.2. of Part C.
- (¹⁶) Where applicable, information on sexed embryos or on the stage of development of the embryo may be provided.
- (¹⁷) That individual shall be a representative of the breeding body, including official service of the country of dispatch, which is listed in accordance with Article 34 of Regulation (EU) 2016/1012, or of an embryo collection or production team acting on behalf of the breeding body in accordance with Article 33(1) of that Regulation, who is authorised to sign the zootechnical certificate.

Notes:

- The zootechnical certificate shall be issued in at least one of the official languages of the country of dispatch.
- The colour of the signature must be different from that of the printing.
- The zootechnical certificate may be issued in portrait or landscape orientation.
- The footnotes and notes of this zootechnical certificate may not be printed, provided a reference to a directly accessible multilingual source of information is included in the title.
